Tauá - CE, Brazil

Profile

Software developer focused on frontend and Angular. I work as a **Frontend Developer at Shuffle Up** and maintain **Inhamuns Crono**, a sports timing platform I created that is in production in Ceará, Brazil.

I have been building for the web since 2021, with experience in frontend (Angular, React and Vue), backend (Node, NestJS and Java) and integrations. I am an undergraduate student in Information Systems at the Federal University of Ceará - *Campus* Quixadá.

See my **portfolio**, my projects on **GitHub** or connect with me on **LinkedIn**.

Professional Experience

Dec 2024 - Present | Frontend Developer (L4) at Shuffle Up

Full-time, remote (Tallinn, Estonia).

- Develop web applications using Angular, HTML5, CSS3 and Angular Material.

Skills: Angular · TypeScript · Angular Material · HTML5 · CSS3

2025 - Present | Creator and developer of Inhamuns Crono

Own product, in production in Tauá - CE and nearby cities.

- Design, build and operate a platform for registration, payment, RFID chip timing and live results for road running and MTB races;
- Maintain the web application, the API, the bridge to the RFID readers and the desktop console used on race day.

Skills: Angular · NestJS · PostgreSQL · Prisma · Java · Tauri · Socket.IO · Mercado Pago

Sep 2023 - Dec 2024 | Fullstack Developer at Elevar Commerce

Dec 2022 - Aug 2023 | Fullstack Development Intern at Elevar Commerce

Remote (Fortaleza - CE). Promoted to developer after the internship.

- Develop and maintain web and mobile applications for e-commerce, both frontend and backend, including integrations and other features inherent to this type of product.

Skills: Angular · AngularJS · Angular Universal · Vue · Nuxt · Node · Java · Firebase · Ionic · SCSS (Sass) · SQL · Rest API · Scrum Methodology

Jul 2021 - Nov 2022 | Technological Innovation Scholar in Frontend Development at GREat - Computer Networks, Software Engineering, and Systems Group of UFC by FUNCAP

- Develop and maintain web applications focused on order and process management for the State Government of Ceará.

Skills: React · HTML · SCSS (Sass) · Ant Design · Rest API · Scrum Methodology

---
